

XM has brought a world full of enjoyment and easy listening to my car speakers and home speakers. For the longest time, I've had to deal with static, and boring morning radio DJs, along with numerous amounts of commercials, most of those commercials occurring when I want to listen to music or true content the most. XM gives me freedom of static and boring radio DJs by having stations that offer what I want, when I want. The Traffic and Weather reports are continuous, allowing me to find data on the spot, rather than waiting for a DJ to finish his punchline before deciding to tell the weather. Please allow XM to continue and further it's goals. I can't imagine going back to normal FM or AM. XM is the only way to go.
